**Continue**

trick If hearts or spades: 30 per trick If notrump: 40 for the first trick and 30 for each subsequent trick If the contract was doubled the above scores are doubled. If it was doubled and redoubled, they are multiplied by 4. In addition, the declarer's side scores an extra 50 points above the line if they succeed in a doubled contract. This is sometimes known as "50 for the result." For making a redoubled contract the bonus is 100 above the line. Because of the difference in score, clubs and diamonds are called the minor suits, and hearts and spades are the major suits. Slam bonus: A contract to make 12 tricks is known as a small slam. A contract to make all 13 tricks is called a grand slam. Bidding and making a slam earns the declarer's side a bonus above the line, depending on their vulnerability, as follows: Slam bonus Small slam Grand slam Not vulnerable 50 1000 Vulnerable 750 1500 Score for overtricks If the declarer's side wins more tricks than were bid, in a contract that was not doubled, they will get an additional score above the line for the overtricks, at the same rate: 20 per trick for minor suit contracts; 30 per trick if the contract is in a major suit or notrump. If the contract was doubled or redoubled, the bonus for overtricks does not depend on the trump suit, but does depend on whether the declarer's side was vulnerable as follows: Score per overtrick Doubled Redoubled Not vulnerable 100 200 Vulnerable 200 400 Penalty for undertricks If the declarer's side wins fewer tricks than it bids, neither side scores anything below the line, but the declarer's opponents score above the line. This score depends on the declarer's side's vulnerability, and whether the contract was doubled or redoubled, as follows: Undertrick penalty: Not vulnerable Vulnerable Each undertrick not doubled 50 100 First doubled undertrick 100 200 2nd and 3rd doubled undertricks 200 each 300 each Redoubled undertricks cost twice as much as doubled undertricks Honors The top five trumps (A K Q J 10) are called honors. If one player holds all five of these cards, that player's side scores a bonus of 150 above the line. Four honors in one hand scores 100. If there are no trumps and a player holds four aces, that player's side scores 150 for honors. As there is no skill in scoring for honors, players often agree to play without the honor bonuses. Game and Rubber A side that accumulates 100 points or more below the line wins a game. A new line is drawn under the scores. Anything the opponents had below the line does not count toward the next game; they start from zero again. It is important to notice that, starting from zero and in the absence of doubles, to make a game in one hand you need to succeed in a contract of at least 3NT, 4♠, 4♥, 5♠ or 5♥. The side that first wins two games wins the rubber. For this, they get a bonus of 700 if they won it two games to zero, or 500 if it was two games to one. Both sides' scores are then totaled. If the game is played for money (or cookies, or pencils), the side with the higher score wins even if the rubber isn't won. Example of Rubber Bridge Scoring The scoresheet of a completed rubber might look like this (the letters in brackets refer to the footnotes—they would not appear on the scoresheet): We They 500 (f) 50 (D) 100 (f 200) (e) 500 (f) 300 (f) 30 (f) 60 (a) 30 (c) ===== We bid 2♠ and made 10 tricks: 60 below the line for the contract and 60 above for the overtricks. They bid 4♥, we doubled them, and they took only eight tricks. We score 100 for their first undertrick and 200 for the second, as they are not vulnerable. They bid 3NT and made 10 tricks. This gives them a game (100 below the line), so a line is ruled. They also get 30 points more above the line, for the overtrick They bid and made 3♠. They bid 2♠ and made only six tricks. They are now vulnerable, so we score 100 for each undertrick. We bid 6♥, they doubled us, but we won all 13 tricks. We score 360 (180 x 2) below the line for our doubled contract, giving us a game (a line is ruled); 100 above for our doubled non-vulnerable overtrick; 50 above for making a doubled contract; and 500 bonus for a small slam bid and made. They bid 1NT and took eight tricks. Note that their previous 90-point score was part of the previous game, so the 40 below does not give them a game. We bid 3♠ and made exactly nine tricks. They bid 3♠ and took exactly nine tricks giving their second game and the rubber, for a bonus of 500 (two games to one). Adding up the scores, we have 1690 and they have 880. Therefore we have won by 810 points (even though they won the rubber). This is the game most usually played by pairs in bridge clubs and tournaments. Generally, you play two or three boards at a table—this is called a round—and then one pair moves to another table and plays other boards against other opponents. Scores for each hand, or board, are recorded and given to the director to tally the results of the entire game. Each pair has a number to identify them and this must also be entered on the scoresheet to show whose result it is. At the end of the whole session, each pair is awarded 1 matchpoint for each pair who scored worse than them on a board, and 1/2 matchpoint for each pair who scored equally. The scoring now is simplified by a program called ACBLscore developed by the ACBL and used internationally. A completed scoresheet might look like this: Board No. 1 Pair No. North-South Matchpoints NS EW Contract By Tricks Plus Minus NS EW 1 8 4S N 10 420 2.5 3.5 2 13 3NT S 10 430 4 2 3 11 5C\* E 8 500 6 0 4 9 4S N 10 420 2.5 3.5 5 14 4S N 11 450 5 1 6 12 5S N 10 50 0 6 7 10 3S N 10 170 1 5 Then the total matchpoints scored by each pair over all the boards are calculated. This is generally converted to a percentage, for each pair, of the points they scored compared to the theoretical maximum. This gives a fair comparison between pairs who have played different numbers of boards. Team play has become popular in clubs and tournaments. Two members of your team, playing as a partnership, sit North-South at one table. Two other members of your team, also playing as a partnership, sit East-West at a different table. The two pairs from the opposing team fill the empty spots at the two tables. During the course of the match, exactly the same boards are played at both tables. Each player should have a score card to record the score on each board. The card has a row for each board. The beginning of North's card from table 1, when completed, might look like this: Board Final Score IMPs Deal # Vul Contract By Plus Minus Plus Minus N 1 - 4S 5 420 E 2 NS 5D\* W 500 S 3 EW 3NT W 690 W 4 All 2H N 140 Note that the scoring for actual contract is the same as in duplicate scoring. What will change is how the scores at both tables are compared. In the contract column 5D\* (diamonds) means 5D doubled. The "By" column shows who was declarer. The score is recorded from North's point of view, so when West goes down in 5D, it is positive. The International Matchpoints (IMPs) can be filled in only when this card is compared with one from the other room. Suppose that our teammate East at the other table has a card like this: Board Final Score IMPs Deal # Vul Contract By Plus Minus Plus Minus N 1 - 4S 5 450 E 2 NS 4H N 620 S 3 EW 6NT W 1440 W 4 All 4H N 100 Now the differences can be converted to IMPs for the team. The following standard International Matchpoint Scale is used: Point difference IMPs 0 - 10 0 20 40 1 50 - 80 2 90 - 120 3 130 - 160 4 170 - 210 5 220 - 260 6 270 - 310 7 320 - 360 8 370 - 420 9 430 - 490 10 500 - 590 11 600 - 740 12 750 - 890 13 900 - 1090 14 1100 - 1290 15 1300 1490 16 1500 - 1740 17 1750 - 1990 18 2000 - 2240 19 2250 - 2490 20 2500 - 2990 21 3000 - 3490 22 3500 - 3990 23 4000 or more 24 So in the example, on the first board the difference between the two tables was 30 against us, and we lose 1 IMP. On the second board we lose 3 IMPs. Although our North-South pair defeated West's 5, with the same cards our East-West pair allowed North to play and make 4. On board 3, where we bid the small slam while they stopped in game, we gain 13 IMPs for a 750-point difference. On board 4 both Norths made nine tricks in hearts, but we gain 6 IMPs because our North-South pair just bid 2 rather than 4. Overall we are 15 IMPs ahead of those four boards. At the end of the match, the result is the difference in IMPs between the teams. Sometimes there is then a further conversion of this margin into a match result, in which some fixed number of victory points is apportioned between the teams. There is no standard conversion table, but here is an example table for a 24-board match: IMP difference Victory Points 0 - 2 10 - 10 3 - 6 11 - 9 7 - 11 12 - 18 13 - 7 17 - 21 14 - 18 22 - 27 15 - 5 28 - 33 16 - 4 34 - 39 17 - 3 40 - 46 18 - 2 47 - 54 19 - 1 55 or more 20 - 0 in the example, if we were still 13 IMPs ahead having played 24 boards, using this table we would win the match 13-7. If the match was part of some larger competition, such as a league, then we would score 13 victory points and our opponents would score 7. Teachers with \* have earned ACBL's Online Teacher Certification. Patricia Parker pats4949@hotmail.com 1 on 1 in ACBL on BBO; 2 levels. Play with private chat notes David Rankin diran36@cox.net teaching newer/intermediates Other Opportunities Teachers listed in bold have earned ACBL's Online Teacher Certification. At duplicate bridge (where every table plays the same deals), every deal is scored separately and no part scores are carried forward. Remember the number of tricks your partnership is willing to commit to over the book of six. 1 is a commitment to take 6 + 1 = 7 tricks. You earn 40 points for the first notrump trick scored and 30 points thereafter; 30 points for each spade and heart trick; 20 points for each club and diamond trick. Trick values double in doubled contracts and are doubled again for redoubled contracts. Examples: If we bid 2 in a major suit and make 4 (10 tricks) we score 170 (60 for 2 bid and made, 60 for two overtricks and 50 for the part score). If we bid 4 in a major suit and make it when we are not vulnerable we score 420 (120 for the contract and 300 for the game). If we bid 4 in a major suit and make it when we are vulnerable we score 620 (120 for the contract plus 500 for the game). Whenever one side scores a slam, or a game, or a partscore, the side collects, in addition to the trick score, an immediate bonus. For instance: For making a vulnerable grand slam 1,500 For making a non-vulnerable grand slam 1,000 For making a vulnerable small slam 750 For making a non-vulnerable small slam 500 For making a vulnerable game 500 For making a non-vulnerable game 300 For making a partscore 50 For making a doubled contract 50 For making a redoubled contract 100 If the declaring side makes one or more overtricks, the side collects per overtrick: For an undoubled contract, non-vulnerable Trick Value For a doubled contract, non-vulnerable 100 For a redoubled contract, non-vulnerable 200 For an undoubled contract, vulnerable Trick Value For a doubled contract, vulnerable 200 For a redoubled contract, vulnerable 400 When the contract is defeated, the opponents collect: For each non-vulnerable trick 50 For each vulnerable trick 100 Not vulnerable doubled 100,300,500 for down 1, 2 and 3 (300 more for each additional trick) Vulnerable doubled 200,500,800 for down 1, 2 and 3 (300 more for each additional trick) Not vulnerable redoubled 200, 600, 1000 for down 1, 2 and 3 (600 more for each additional trick) Vulnerable redoubled 400, 1000, 1600 for down 1, 2 and 3 (600 more for each additional trick) These scores, of course, are not yet the final scores. They have yet to be compared with the scores achieved by other people who have played the same cards. The method of doing this comparison varies according to what kind of duplicate is being played.
